#### **Report of Best Practice of Institute**

Community oriented diseases awareness program is an activity of our institute to provide social platform to our students as upcoming pharmacist, to know the need of society about health and hygiene, what is the actual roll of health professional towards the community. Poor hygiene and improper water, sanitation, and food supply strategies, in addition to inadequate care of wounds and injuries, can create an environment polluted with bacteria and viruses. The pharmacists being healthcare professional can be involved in disease prevention and control in many ways. For example, they can help to develop institutional screening programs to check immunization status and identify undiagnosed medical conditions (e.g., hypertension, diabetes, hyperlipidemia, depression, substance abuse, behavioral health issues). Reducing the spread of diseases, advocating the prudent application of antimicrobial drugs, and educating medical personnel, patients, and the general public are all duties of pharmacist in the society.

Community oriented diseases constitute a considerable proportion of the global burden of morbidity and mortality. Our educational institute is working in the healthcare sector by facilitating pharmaceutical science knowledge for students. So it's our duty to raise awareness about various metabolic disorders and communicable diseases in society.

In the first step of this practice, our institute is taking the initiative for the preparation of MOUs between different members of society who are working on public health and hygiene services. So our institute, Saswad Nagerpalika (the local government body), the Medical Association of Purandhar, and the Rotary Club of Purandhar come together on the same issue and prepare an MOU. According to the MOU, all organizations decided to work together on the same issues to prevent or control various diseases by raising awareness in society. In a meeting of all the parties, it was collectively decided to do a health survey of a few slum areas of Saswad city, and then, according to the obtained data, a group of individuals or families will be treated by medical associations, doctors and to arrange a health checkup camp for society. The society is made aware through street plays during health awareness rally on the occasion of National Pharmacy Week.
